# SEDAN SALON

The 2013 Jaguar XJ Ultimate limited-edition sedan is powered by a supercharged 5.0-litre V8 engine that produces 510 hp. Its interior features two individually tailored backseats with lumbar support, massage functions and climate controls. A 20-speaker Meridian surround-sound system, iPads and mounted screens complete the experience. The back of each front-seat headrest carries an eight-inch screen. Celebrations are in order with a chiller for the bubbly and a pair of bespoke champagne flutes. The vehicle was unveiled in China earlier this year and 30 more cars will be made available in the United States. [www.jaguar.com](http://www.jaguar.com)

# TIME & GAIN

The Joux Valley Museum of Watchmaking has reopened as a self-proclaimed “new generation” museum after eight months of intensive renovation. Learn about the creation of some of the world’s most celebrated timepieces through 3D films and presentations by students from the Joux Valley Technical College. Spread over 500 square metres of floor space, the museum lets visitors try their hand at assembling their own mechanical movements. [www.espacehorloger.ch](http://www.espacehorloger.ch)

# GAME OF CHANCE

Swiss watchmaker Daniel Roth brings back the automaton watch with the Bulgari Daniel Roth Il Giocatore Veneziano. Inspired by Italian baroque artist Caravaggio’s masterpiece, *The Cardsharps*, the watch features a lavish dial displaying a 16th-century Venetian dice player. When engaged, the automaton figure throws the dice and lifts the goblets in its hand to reveal ever-changing results. The timepiece also contains a minute repeater. Available in 18-carat white or rose gold, each piece is uniquely hand painted. [www.bulgari.com](http://www.bulgari.com)

# Sleek Seafarer

Three new superyachts ranging from 40 to 60 metres are the latest additions to Swedish designer Gray Design’s Strand Craft collection. Each yacht comes with luxurious features such as a cinema, retractable pools and a hidden sunbed area that appears at the push of a button. The use of strong but lightweight materials, such as carbon, help achieve better fuel economy. Engine packages from MTU with KaMeWa Jets enable high-speed performances of up to 48 knots.
